

# CMC Project Director

Are you our new CMC Project Director with extensive experience within Product Development Scantox Ballerup part of Scantox Group (formerly Solural Pharma) has an exciting new position as CMC Project Director available and is looking for an experienced new colleague that can thrive with multiple development projects and coordination (project management).

As the CDMO facility of the Scantox group, we work with clients from pre-formulation and formulation development all the way to GMP production and delivery of Investigational Medicinal Products for phase 1 and 2 clinical trials. Our areas of expertise are oral and topical products, and we are proud to be able to support clients with custom-made solutions.

## **Your tasks will consist of, among other things:**

You will be overall responsible for timely management of all CMC projects within Scantox Ballerup. This means but not limited to interactions with clients to understand their scientific needs as well as project plans and setting up a functional project system to ensure coordination and prioritization internally to meet timely deliverables.

You will work in close collaboration with our development team to ensure timely project progress. The work will also include scientific support in the preparation of the overall CMC Development Plan and clients IMPD and IND regarding the Drug Product Section.

Further you will collaborate with our internal commercial team as well as scientific and operational colleagues from other parts of the Scantox Group.

## **We are looking for a candidate with:**

- Several years of project management skills from the pharmaceutical industry especially with focus on CMC projects
- Solid founded in pharmaceutical development within CMC; preferable oral and topical formulations
- Experience and knowledge within regulatory guidelines and quality regulations within CMC
- A service-minded approach, the ability to maintain an overview and work structured with multiple tasks at once, as well as the ability to make independent decisions
- Curious and eager to implement and use digital solutions to improve workflows and quality

You will be working in close collaboration with the Site Manager and the rest of the dedicated development team.

## **We offer:**

A workplace based on high quality and dedicated staff and a good laugh that are on a growth journey.

- Flexible working conditions
- Competitive salary based on your qualifications

Interested? For further information about the position, contact Site Manager Ann Fullerton ([afl@scantox.com](mailto:afl@scantox.com)).

If you want to continue your career in an exciting company characterized by an informal atmosphere and a busy everyday life, please send your application and CV as soon as possible.

Application deadline: 10 January 2024

Scantox Ballerup has laboratories in Ballerup, where we currently have 18 dedicated employees who work together to develop and GMP manufacture pharmaceutical products for clinical trials.
